

No Software Support for macOS 11 (Big Sur)

Your device is not supported on macOS 11 (Big Sur).

Starting with macOS 11 (Big Sur), Apple has a [new policy](#) which means after updating to macOS 11 Logitech Control Center (LCC) software will not display your device.

You can find more information here:

[Logitech Control Center \(LCC\) & macOS 11 \(Big Sur\)](#)

[Which Logitech Control Center devices are not supported in Logitech Options?](#)

If you need to contact support, please use this form:

www.logitech.com/support/bigsupport

You will still be able to use basic functions such as left-click, right-click, middle button, and scroll wheel. We recommend you should use macOS 10.15 or lower so you maintain product functionality.
